JB83 Fire Extinguisher cabinet

Typical use:

For the storage of 2 x 6-12kg/litre fire extinguishers (max height 700mm) designed to cope with extreme environments on and offshore. It is widely used by the world's top energy company due to its durability.

Description:

These cabinets are manufactured using Lloyds approved composites including UV resistant gelcoats to provide long lasting protection for the fire extinguisher in even the harshest environments. This is backed up with an excellent IP rating of 56. It has both Lloyds and ABS approvals.

The design ensures a high level of rigidity for the relatively low weight with a very effective EPDM seal around the door aperture. The hinges are secured with 316 stainless steel nuts, bolts and washers.

The door can be specified with left or right hinging and features a nylon rotary handle with anti-tamper facility to guarantee fast access in an emergency even when wearing gloves.

Standard specification:

Dimensions (mm)

Height x width x depth: 816 x 548 x 344

Aperture: 650H x 391W

Internal depth: 294

Weight Kg: 11.5Kg

Material specification:

Colour: Red RAL 3000

Material: Lloyds approved composites with UV stabilised gelcoat

Hinge: 316 Stainless steel

Handle: Nylon/316 Stainless steel rotary

Seal: EPDM

Optional Extras:

Other RAL colours

Class 1 fire retardant composites

Perspex window

Heaters for cold climates
